Objective

Strategic SDET Architect and leader with 12+ years of experience across enterprise SaaS, education technology, transaction processing, rewards platforms, Capital Markets, and Financial Services. Experienced in architecting scalable API, UI, data, integration, and performance automation; establishing STLC governance; embedding quality into CI/CD; and leading engineers across automation and validation. Strong hands-on background in Java, Python, SQL, REST Assured, Selenium, TestNG, Pytest, Gatling, and data validation, with additional expertise in PySpark, MLOps, machine learning, model validation, and GenAI-driven test automation.

Education

B.Tech – Computer Science & Engineering
Orissa Engineering College (BPUT), Bhubaneswar | 2010 – 2014

Higher Secondary Education (Science Stream)
Jawahar Navodaya Vidyalaya, Surangi, Ganjam | 2009

Certifications

- **Machine Learning Specialization** – Columbia University
- **Deep Learning** – DeepLearning.AI
- **Python Development** - Microsoft
- **TensorFlow Developer Certificate** – Google

Languages

- English
- Hindi
- Odia

Skills:

- **Programming & Automation:** Java, Python, SQL, CI/CD (Jenkins, Git), LINUX, Performance Testing (Gatling), Framework Development (API & Data), Selenium, REST-assured, Pytest, Cucumber BDD
- **Data & AI:** Data Test Automation, PySpark, MLOps, Machine Learning (TensorFlow, PyTorch), Model Validation, Gen AI Integration
- **Domain:** Capital Markets / Financial Services, Middle Office Operations, Wealth Management Data Integrity, Regulatory Guardrails, eProc, eLearning, Customer Loyalty and Engagement
- **Tools & Methodologies:** Jira, Agile/Scrum, Linux, Postman, Grafana
- **Soft Skills:** Team leadership, mentoring, cross-functional collaboration

Experience:

SDET Manager - Loylty Rewardz | Aug 2023 – Present

- Architected enterprise-wide Quality Engineering strategy and automation architecture for transaction processing and reward management platforms using Java, REST Assured, Selenium, SQL, and CI/CD.
- Lead a 5-member SDET team, providing technical direction, framework standards, code reviews, mentoring, and ownership across API, UI, data, integration, and performance automation.
- Designed reusable automation frameworks and quality engineering components to improve test scalability, maintainability, regression coverage, and execution efficiency across multiple applications.
- Integrated automated validation into CI/CD pipelines, establishing quality gates, release-readiness criteria, STLC governance, and quality metrics for production deployments.
- Implemented AI-assisted test automation for complex scenarios, including intelligent handling of CAPTCHA-based flows in controlled test environments, test-data generation, validation, and reduction of manual intervention.

SDET Lead - upGrad Education | Sep 2022 – July 2023

- Led quality engineering initiatives for large-scale digital learning platforms.
- Developed automation and performance testing solutions to validate platform scalability and reliability.
- Implemented automated regression suites integrated with CI/CD pipelines.
- Collaborated with cross-functional teams to validate analytics-driven business features.

Senior SDET - BNP Paribas | Dec 2018 – Sep 2022

- Delivered end-to-end quality assurance for Capital Markets and Financial Services applications supporting business-critical operations.
- Worked extensively on trade lifecycle validation, transaction processing systems, and market data testing.
- Designed and maintained enterprise automation frameworks using Java, Selenium, REST Assured, and TestNG.
- Executed API, database, and integration testing for trading and middle-office platforms.
- Developed Python-based automation utilities for test data generation and validation.
- Contributed to performance, scalability, and latency testing initiatives for high-volume transaction systems.
- Collaborated closely with business analysts, traders, operations teams, and development teams to ensure production readiness.
- Integrated automation suites with Jenkins and GitLab CI/CD pipelines.

SDET - Zycus Infotech | Jul 2014 – Dec 2018

- Developed and maintained enterprise-grade automation frameworks using Java, Selenium, and TestNG.
- Automated complex business workflows and large-scale data validation processes.
- Performed API, UI, and database testing for enterprise SaaS applications.
