Objective

Highly accomplished and strategic SDET with 10+ years of comprehensive experience in architecting, leading, and transforming Quality Engineering functions for high-performance data and service components. Proven expertise in establishing STLC governance, driving measurable automation ROI (API/Data/Platform), and leveraging Gen AI for validation efficiency.

Certifications

- Machine Learning Specialization – Columbia University
- Deep Learning – DeepLearning.AI
- Python Development - Microsoft
- TensorFlow Developer Certificate – Google

Languages

- English
- Hindi
- Odia

Skills:

- **Programming & Automation:** Java, Python, SQL, CI/CD (Jenkins, Git), LINUX, Performance Testing (Gatling), Framework Design (API & Data), Selenium, REST-assured, Pytest, Cucumber BDD
- **Data & AI:** Data Test Automation, PySpark, MLOps, Machine Learning (TensorFlow, PyTorch), Model Validation, Gen AI Integration
- **Domain:** Capital Markets / Financial Services, Middle Office Operations, Wealth Management Data Integrity, Regulatory Guardrails, eProc, eLearning, Customer Loyalty and Engagement
- **Tools & Methodologies:** Jira, Agile/Scrum, Linux, Postman
- **Soft Skills:** Team leadership, mentoring, cross-functional collaboration

Experience:

SDET Manager - Loyalty Rewards | Aug 2023 – Present

- Architected and led the quality strategy for core data platform components, establishing QA guardrails and stringent processes that ensured high-fidelity data validation, directly improving production stability.
- Architected a scalable automation framework for the reward point engine using Java, ensuring accuracy and reliability.
- Led and mentored a cross-functional automation team, driving code quality, CI/CD integration, and efficient test strategy execution.
- Designed and deployed an Image-to-Text ML model for solving captcha challenges, improving test automation coverage.
- Held complete ownership of the Software Test Lifecycle (STLC) for major platform releases, managing project risks proactively and providing regular, concise executive updates to technology and business stakeholders.

SDET Lead - upGrad Education | Sep 2022 – July 2023

- Designed automation pipelines for AI-powered live learning platforms.
- Applied data-driven performance testing to optimize scalability and concurrency handling.
- Collaborated with ML teams to integrate predictive analytics into QA workflows.

Senior SDET - BNP Paribas | Dec 2018 – Sep 2022

- Built automation frameworks (Java, Selenium) cutting regression testing effort by 30%.
- Developed Python scripts for test data generation to support ML validation tasks.
- Partnered with data science teams to validate AI-powered models within QA pipelines.

SDET - Zycus Infotech | Jul 2014 – Dec 2018

- Designed and maintained automation frameworks (Java, Selenium, TestNG).
- Enhanced QA for analytics-driven applications involving large datasets.
- Collaborated with cross-functional teams on test plans for data-intensive modules.

Education:

B.Tech – Computer Science & Engineering
Orissa Engineering College (BPUT), Bhubaneswar | 2010 – 2014

Higher Secondary Education (Science Stream)
Jawahar Navodaya Vidyalaya, Surangi, Ganjam | 2009
